

Questions for the care team

In addition to anything unique to your loved one's situation, consider asking the following questions:

- Diagnosis and what it means
- Symptoms
- Prognosis
- Treatment plan
- Medications - including dosage, expected response, and potential side effects.
- When can you meet with the care team again to discuss progress?
- What is the best contact name and phone number for the treatment team?
- What is the aftercare plan?
 - What level of care is appropriate?
 - Have any referrals or appointments been made?
 - What should we do if symptoms worsen again?
